

DAILOVE A96

Acid and Alkali Chemical Permeation Gloves

- CSM (Chlorosulphonated Polystyrene) is a photoresistant compound.
- Excellent flexibility, making it suitable for a wide range of work
- High weather resistance, has a degradation difficult nature
- Strengthen the grip in the form of particles of non-slip
- Granulated palm with Synthetic fibers lining
- Colour : Grayish Green
- Size : L
- Thickness : 0.9mm
- Length : 350mm
- Packing : 50prs/ctn

Precision machinery

Glass plating

Physics and chemistry

Dipping

- Used in electronics manufacturing
- Waterproof make it suitable for parts cleaning
- Use in solvent production that take advantage of the capabilities of the material
- Used in the experiments in the research facility
