Part #	Description	Dimensions (WHD) Inches
50004	White PVC Lockable 30 Column HPLC Storage Cabinet with Clear Acrylic Doors	16 x 17 x 3

Made from white PVC and acrylic. Holds up to 30 analytical columns. Protects from dirt and dust. Lockable hasp. Produced with high quality expanded PVC body. Choose either a clear or neon green or neon blue acrylic doors. Mounts with two standard sized keyholes.

It's so convenient, you won't believe how these cabinets made columns easy to store, find and retrieve. They practically fill themselves, giving you the peace of mind that you've got the column you need by your side whenever necessary. The crystal clear acrylic doors make viewing a snap and columns fit easily on arms to maximize storage. And you'll be impressed by how columns seem to be where you need them when you need them; these HPLC cabinets are one of TrippNT's most popular storage products as a workhorse in the lab. Made in the USA.

PVC plastic cabinet with clear acrylic doors with locking hasp. Mounts on wall with cut away key holes in back (hardware not included).
